AUTOMATIC CERTIFICATE GENERATOR

Team members:

Surya Kandikonda

G. Chaitanya

Type: Web Application

Idea: To develop a web application that takes the information about the Participated student, email and automatically design a certificate with the name and given details. And finally email the certificate to the user.

Technologies used: HTML, CSS, JavaScript, PHP, SQL

The design of the web page is done using HTML and CSS. The script to design the web pages and to retrieve data from csv file is done using JavaScript.

And we develop admin page to upload the new design templates.
